DevOps as a Service (DaaS)

The Challenge

Having adequate resources to implement and deliver DevOps tool chains to software delivery teams can be an overwhelming project for many IT organizations.

The Solution

Column Technologies recognizes and understands these challenges. We’ve architected an integrated DevOps technology solution that resides in Amazon’s Cloud. Column Technologies automates the software delivery process and ensures stability, security, and visibility. It’s all about enabling your organization to deliver your software Better, Faster, Stronger.

IDC Report: DevOps and the Cost of Downtime

“IT organizations that have tried to custom adjust current tools to meet DevOps practices have a failure rate of 80%, thus making tool replacement and a critical requirement.”

DevOps and the Automated Flow of Data

DevOps success requires a high degree of Automation and helps organizations…

- Deploy 30x more frequently
- Have 200x shorter lead times
- Have 60x fewer failures
- Recover 168x faster
**Technology Partners**

Automation is the Key to DevOps Success

- **Build**
  - Bitbucket
  - Jira Software
  - Confluence

- **Test**
  - JFrog Artifactory

- **Stage**
  - cloudbees

- **Deploy**

**Overview**

DevOps as a Service transforms siloed software development tool chains managed by individual development and operations teams to the cloud, where many of the SDLC processes can be automated using stackable virtual development tools and managed as a single tool platform.

As many organizations adapt DevOps and migrate their application environments to the cloud, so too will their tools used in build, test, and deployment processes, effectively making continuous delivery itself a managed cloud service. With Column's DevOps as a Service, an organization can easily automate the following key SDLC key disciplines:

- Ideation
- Planning
- Bugs and request tracking
- CI/CD
- Code repository
- Artifact repository

**Benefits**

- Single vendor approach with 24x7 Support
- System reliability 99.99% guaranteed uptime
- Lower TCO with predictable service
- No upgrade costs
- SDLC best practices
- No tools management required
- Secure platform
